DWA_08 Discussion Questions

In this module you will continue with your "Book Connect" codebase, and further iterate on your abstractions. You will be required to create an encapsulated abstraction of the book preview by means of a single factory function. If you are up for it you can also encapsulate other aspects of the app into their own abstractions.

To prepare for your session with your coach, please answer the following questions. Then download this document as a PDF and include it in the repository with your code.

_____

1. What parts of encapsulating your logic were easy?

The logic dealing with book data filtering or HTML generation was compartmentalized within distinct functions, facilitating easier encapsulation.

_____

2. What parts of encapsulating your logic were hard?

Combining logic with HTML and CSS can pose challenges in terms of readability and maintainability.

_____

3. Is abstracting the book preview a good or bad idea? Why?

Abstracting the book preview into a component allows for easy reuse across the application. This is beneficial when displaying book previews in various sections, enhancing consistency.

_____
